4.10.9.9 PROGRAM REQUIREMENTS: Program requirements include the following criteria and procedures:

A. All plans, specifications, descriptions, or research designs for a project for which a state income tax credit is to be claimed shall be submitted to the committee in a Part 1 application for review at a regularly scheduled meeting prior to the commencement of work.

(1) The application shall be received by the division at least 30 calendar days prior to the committee meeting at which it shall be reviewed.

(2) The application shall describe all work that will affect the property, whether or not it is determined to be eligible for credit, during the project time frame. Photographs and detailed cost estimates shall be included.

(3) The division shall review the submitted application and supporting materials for completeness, accuracy, and conformance with program standards, program expense guidelines, and program eligibility requirements. The division shall attempt to contact the applicant and, if necessary, conduct a site visit to remedy any inaccuracies or inadequacies before further review or processing of the application. The division may recommend to the committee that an application be conditionally approved, tabled, or denied if the application fails to conform with program standards, program expense guidelines, or program eligibility requirements, either upon initial receipt of the application or through failure to respond adequately to a request for information or correction of inaccuracies. The division shall forward all complete applications and recommendations to the committee for consideration at the next scheduled committee meeting.

B. The committee shall consider the eligibility of the property, review the application for conformance with the applicable standards and program expense guidelines, and take action on the application. Such action shall take the form of an approval, approval with conditions, tabling, or denial. The applicant shall be notified of the committee's decision by the division within 14 calendar days of the committee's meeting.

C. Project work may commence only upon notification of the committee's approval.

The amendment application is subject to the same program requirements as the Part 1 application. The approval of an amendment application does not reset or extend the 24-month window for project completion established with the original Part 1 application.

D. After project work has been completed, a Part 2 application shall be submitted for review and certification of approved restoration, preservation, or rehabilitation at a regularly scheduled meeting.

(1) The application shall be received by the division at least 30 calendar days prior to the committee's meeting at which it will be reviewed and within 60 calendar days after the completion of the work, but in no event later than January 25 of the year following the taxable year in which the credit is claimed.

(2) All completed work shall be described and documented with photographs and financial documentation to include a summary sheet of expenditures, detailed invoices, receipts, canceled checks, credit card

statements, or any other materials requested by the division or committee regarding expenses for which credit is sought.

4.10.9.11 STANDARDS:

A. The committee shall review architectural applications for conformance with the secretary of interior's standards for rehabilitation (published at 36 CFR Part 67, reproduced below).

(1) A property shall be used for its historic purpose or be placed in a new use that requires minimal change to the defining characteristics of the building and its site and environment.

(2) The historic character of a property shall be retained and preserved. The removal of historic materials or alteration of features and spaces that characterize a property shall be avoided.

(3) Each property shall be recognized as a physical record of its time, place and use. Changes that create a false sense of historical development, such as adding conjectural features or architectural elements from other buildings, shall not be undertaken.

(4) Most properties change over time; those changes that have acquired historic significance in their own right shall be retained and preserved.

(5) Distinctive features, finishes, and construction techniques or examples of craftsmanship that characterize a property shall be preserved.

(6) Deteriorated historic features shall be repaired rather than replaced. Where the severity of deterioration requires replacement of a distinctive feature, the new feature shall match the old in design, color, texture, and other visual qualities and, where possible, materials. Replacement of missing features shall be substantiated by documentary, physical or pictorial evidence.

(7) Chemical or physical treatments, such as sand-blasting, that cause damage to historic materials shall not be used. The surface cleaning of structures, if appropriate, shall be undertaken using the gentlest means possible.

(8) Significant archeological resources affected by a project shall be protected and preserved. If such resources must be disturbed, mitigation measures shall be undertaken.

(9) New additions, exterior alterations, or related new construction shall not destroy historic materials that characterize the property. The new work shall be differentiated from the old and shall be compatible with the massing, size, scale and architectural features to protect the historic integrity of the property and its environment.

(10) New additions and adjacent or related new construction shall be undertaken in such a manner that, if removed in the future, the essential form and integrity of the historic property and its environment would be unimpaired.

B. The committee shall review archaeological applications for conformance with the following standards for archaeological site preservation.

(1) The prehistoric or historic integrity of a property shall be preserved. The destruction of contributing features shall be avoided.

(2) If standing features on a site are deteriorating, repair and stabilization measures shall be undertaken with sensitivity to the character of the feature. If replacement of materials is necessary, the new shall match the old and appropriate documentation shall indicate restored areas.

(3) Erosion control measures shall be undertaken if features or artifacts of significant sites are disturbed by natural agents. These measures shall not detract from the character of the site and shall not harm significant features.

(4) Site fencing shall be undertaken if a significant site is suffering from human or animal caused disturbance. The location of fencing shall avoid significant features.

(5) Sign installation shall be undertaken if an owner wishes to protect a significant site from unauthorized excavation. Sign wording must be approved by the cultural properties review committee. Signs shall not be posted in areas which would disturb archaeological features.

(6) Camouflaging a site with vegetation or soil shall be undertaken if an owner is concerned about vandalism. Appropriate documentation shall precede this activity.

(7) Professional archaeologists shall be consulted when performing site preservation activities.

B. Any restoration, preservation, or rehabilitation executed prior to the listing of the property on the register is not eligible for the income tax credit program.

C. The committee shall refer to the division's program expense guidelines, which are available on the division's website or upon request, to determine whether expenses for work are eligible for credit and approve project costs accordingly.

D. The expenses incurred for work on a registered cultural property's buildings or structures that are not certified as contributing shall not be eligible for credit.

E. Only the expenses incurred for work on the portions of an eligible property that date to the period of significance per the register nomination and, where unclear, according to the evaluation of the committee and the recommendations of the division shall be eligible for credit.

F. The expenses incurred for work not previously included and approved in a Part 1 application or amendment application shall not be eligible for credit.

G. The expenses incurred for work that is not eligible shall not be reflected in the committee-approved total creditable project cost.

4.10.9.13 CESSATION OF TAX CREDIT: In case of the removal of the property from the register by the committee because of unauthorized or improper alteration or preservation technique that destroys the significant qualities of the structure, or by reason of destruction or loss of the property, the division will inform the taxation and revenue department that no further credit may be claimed by that owner for that project.

[4.10.9.13 NMAC - Rp, 4.10.9.13 NMAC, 1/1/2026]

A. All requests for an appeal shall include a written statement of the applicant's reason for requesting an appeal and any additional information that the applicant believes will support the appeal.

B. Within 14 calendar days of receipt of a written request for a hearing, the division shall inform the applicant in writing of the next possible scheduled committee meeting at which the appeal will be heard. The notice of public hearing shall be published pursuant to Section 9-4A-6 NMSA 1978 of the Cultural Affairs Department Act.

(1) The chair of the committee shall convene the committee as the hearing panel.

(2) The chair of the committee or their designee shall serve as the chair of the hearing panel. Hearings will be conducted in accordance with the committee's rules of procedure.
